Luciano Corso

SENIOR QUALITY · ENVIRONMENT · SUSTAINABILITY CONSULTANT

Dear Sir or Madam,

my name is Luciano Corso and I have worked in quality for more than 18 years, almost always directly on the shop floor: on the line, at suppliers' plants, alongside the people who make the product. I have worked in the automotive, railway and renewable energy sectors, on precision machining, electronics, plastic injection moulding, welding, painting, and heat and galvanic treatment processes.

As a manager I have led quality and environmental systems; I have prepared companies for IATF 16949 and ISO certification, also abroad and in English, and I have supported suppliers across Europe with VDA 6.3 process audits. At Pasubio's Serbian plant I developed the staff all the way to certification, helping to bring in customers such as Porsche, BMW and Jaguar Land Rover.

Since 2024 I have been working as a freelancer, offering companies hands-on experience for as long as they need it:

- supplier audits and qualification;
- resident inspection and witness testing;
- management systems and certification readiness (IATF 16949, ISO 9001, ISO 14001, ISO 45001);
- interim quality manager;
- coaching, mentoring and training for quality engineers, quality managers and production teams.

My method is simple: understand the risk, measure, act, and leave people with the tools to carry on by themselves. I work in Italian, English and French.

I would be glad to discuss your needs in a meeting, in person or remotely.

Kind regards,

Luciano Corso
